

“The highest performing group environments for any specification”

DesignOptions offers two different styles of training tables for the hi-tech learning environment. The **TR Series** training tables are available in a wide range of sizes from 24” deep to 36” deep and 24” wide up to 96” wide. This table provides a pull-thru cable management system for high and low voltage that is accessible from the seated side of the desk. Wires are passed through the wire manager trough and through the legs adjoining the power to the next table. The **WA (Wire Access) Series** training table allows for the same application, only the cables are accessible behind a locked door on the approach side of the table. The WA Series is available in 24” and 30” depths and the width ranges from 36” wide to 72” wide. Specifying DesignOptions training tables, you have the ability to maximize your power and data capabilities in any given learning environment.

POWER CAPABILITIES

STANDARD FEATURES AND OPTIONS ON TRAINING TABLES:

- Horizontal wire trough for cable management between legs with optional cover
- Plenum in wire manager separates and organizes high and low voltage wires
- Vertical wire trough on legs with removable cover to access to cables
- Two grommets standard (left and right locations)
- Height options ranging from 25 1/2” to 38” high-standard height of 28 1/2” high
- Ability to power with four circuit system or single circuit daisy chain system
- Worksurface available as laminate with T-Mold or 3mm edge, or upgraded Designform
- Ability to add study carrels for privacy in classroom or library type setting
- Mobile option available with two locking and two non-locking casters
