March, 2004

Nashua High School South

Project Total List: \$237,000

Dealer: Office Resources

A variety of products were needed to fit administrative, filing, storage and training applications. Product needed to have flexible power options that could be field-installed. In the administrative areas, product being installed had to allow access to wall power/data and HVAC vents.

The Elements Overshelf desking system with wire management allowed for easy access to existing wall electrical outlets and data jacks.

Flexible power options, guaranteed on-time shipment, a wide range of sizes, configurations and color options and the ability to custom match existing laminates made Design Options the obvious choice.
