FREEDOM FOR YOUR ENVIRONMENT

# THE HIGHEST PERFORMING PERSONAL ENVIRONMENTS FOR ANY SPECIFICATION.

## SOLUTIONS

Elements, Training, Filing and Storage

Today, workers find themselves wearing more hats and personally handling more phases of their projects than ever before, so maximizing each inch of space for work is the key to organization and profitability. Design Options products are designed not only for today's users, but for tomorrow's projects.

### DESKING

Design Options freestanding desking systems are designed to accomplish the same role as panel-based systems, but with greater value, simplicity and options for expansion. A modular approach allows specifiers to create custom solutions to get the most work space from their environment. Paper management, computer accessories and power/data support products can be added for productivity.

### TRAINING

Design Options training tables are the perfect choice for your training areas. Combine a power/data option with an integrated wire management system to create a technology-ready environment for learning. Manufactured using heavy gauge steel and modern construction techniques for durability and strength, our training tables will provide years of faithful service.

### FILING AND STORAGE

The key to office organization is filing and storage, and Design Options offers a full spectrum of lateral files, storage cabinets and bookcases. A variety of sizes, configurations and finish colors are available that coordinate with our desking systems and training tables.

DESIGN OPTIONS OFFERS EXPANSIVE WORK SURFACES WITH AMPLE STORAGE SOLUTIONS  
ALL ELEMENTS FREESTANDING

“We needed to maximize our existing space with a system that would allow us to grow into the future. To do that we had to have a system that would hold up to the rigors of the work day and perform for years to come.”

Always Versatile & Expandable

**OVERSHELF SYSTEM**

The stackable overshelf is unique to Design Options. The first overshelf mounts to the work surface, then a matching overshelf can be stacked on top of that unit to double storage capacity.

**FLIPPER DOOR FINISHES**

Available in either a matching painted finish or as fabric covered.

**FLIPPER DOORS**

Locking, retractable doors can be specified for security and to enclose overshelves.

**LEG OPTIONS**

Clearleg option allows for easy movement between work surfaces while full depth legs are specified for end panels.

**INTEGRATED WIRE MANAGEMENT**

Desking units have integrated wire management running horizontally and vertically through the legs.

**Design Options freestanding desking systems.**

The modular Elements Series is infinitely expandable, while the simpler Merit Series ships fully-assembled. Both systems use all steel construction with large work surface options and technology support. Mix and match storage solutions to get the specification you need to get work done.

With Design Options desking systems you can specify a single office or an entire floor of work stations, and feel secure in the knowledge that the product you specified will grow with your company.

Elements desking system is scaled for use in the private office, as well as open space plans. Use the modular building blocks to create team stations and complete offices.

**COORDINATED MATERIALS**

A standard paint, laminate and edge offering has been coordinated with a wide selection of panel fabrics to provide stylish choices for your project. Custom colors are also available.

**PRIVACY TILES**

Tiles provide privacy within the unit footprint without taking any additional floor space.

**DESIGNFORM**

A thermo vacuum process provides a seamless and completely wrapped top.

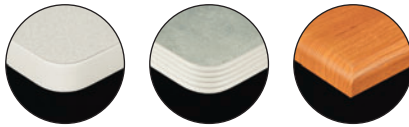

**ERGONOMIC WORK SURFACES**

A variety of curved top shapes can be specified and linked to create productive team stations.

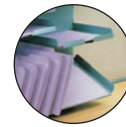

**EDGE OPTIONS**

Elements desking system and training/conference tables are available with a flat or fluted t-mold edge, as well as DesignForm.

**PAPER MANAGEMENT**

Desk accessories encourage organization and keep work surfaces free from clutter.

Storage is the key to office organization. Design Options provides a full spectrum of under counter storage options, including bookcases, lateral files and mixed storage units. Incorporate storage into a configuration or specify as free-standing.

Desking systems surpass panel-based systems by eliminating the complexity and expanse of panels, as well as the amount of space the panels deduct from the work area.

**LATERAL FILES**

A drawer interlock system allows only one drawer to be opened at a time to prevent accidents, and a security key lock ensures the drawers are locked on both sides.

**REINFORCED FILE CONSTRUCTION**

Bottoms are reinforced to reduce the risk of damage when moving lateral file cabinets.

**HIGH CAPACITY LATERAL FILES**

With the 10 1/2" drawer high capacity system, it's possible to store top tab files in all five rollout drawers. Depending on drawer width and configuration, expect an increase of 20-25% in filing capacity.

**TECHNOLOGY ACCESSORIES**

Increase technology support by adding keyboard platforms and CPU holders to training tables.

**WA SERIES TRAINING TABLES**

Wire access training tables have a lockable door on the approach side of the desk for cable and cord management.

**OVERFILE STORAGE**

Additional on-site storage for binders and accessories is available by specifying overfile units.

**Design Options offers organized solutions.**

Design Options completes the work space with a wide scope of storage and filing solutions that coordinate with our desking systems and training offering. Organize your facility and create productive work environments with Design Options.

Design Options offers a full complement of bookcases, lateral files, vertical files, storage cabinets and storage towers. All files provide high capacity storage with full extension ball-bearing slides and reinforced construction. Bookcases, storage cabinets and storage towers are all available with adjustable shelving.

**TR SERIES TRAINING TABLES**

Designed exclusively for training environments and constructed with a heavy gauge steel base, the TR Series training table includes integrated user-accessible wire management and grommets standard.

**TRANSITIONAL WORK SURFACES**

Transitional work surfaces connect training tables to create configurations other than straight rows.

**DAISY CHAIN SYSTEM**

Design Options offers a single-circuit daisy chain system for easy power from a standard outlet.

**WIRE MANAGEMENT**

Standard grommets and built-in raceways make sure that cords and cables can be easily managed.

**MOBILITY**

Training tables can be specified with 3-inch high, locking dual wheel casters for mobility and easy reconfiguration.

**UNDER TOP POWER AND DATA**

Power and data can be specified and easily accessed from the user side of the table.

# Training Tables.

**Design Options provides training environments.**

Training requires tough and dependable furniture that will withstand the rigors of multiple users on a daily basis, and be adaptable to tomorrow's technology. Design Options training tables meet the challenge with two series based on a common frame.

TR Series training tables provide a Pull-Thru cable management system on the user side, while the WA Series incorporates a hinged panel with security lock for managing cables from the approach side.

Convert training tables to study carrels and allow full privacy to the user without altering the top surfaces.

THE PRODUCT YOU SPECIFY TODAY WILL WORK IN YOUR ENVIRONMENT TOMORROW. THERE IS NO OTHER PRODUCT THAT EXPANDS AND ADJUSTS LIKE ELEMENTS.

**FILING AND STORAGE**

Bookcases, filing and storage components can be specified as freestanding units or integrated into configurations.

**WORK/CONFERENCE TABLES**

Great for meetings and project collaborating; adding tables is the smart way to increase work surfaces in an environment.

**TEAM STATIONS**

Organized work spaces increase productivity with shared storage, ergonomic top surfaces and privacy tiles for multi-user units.

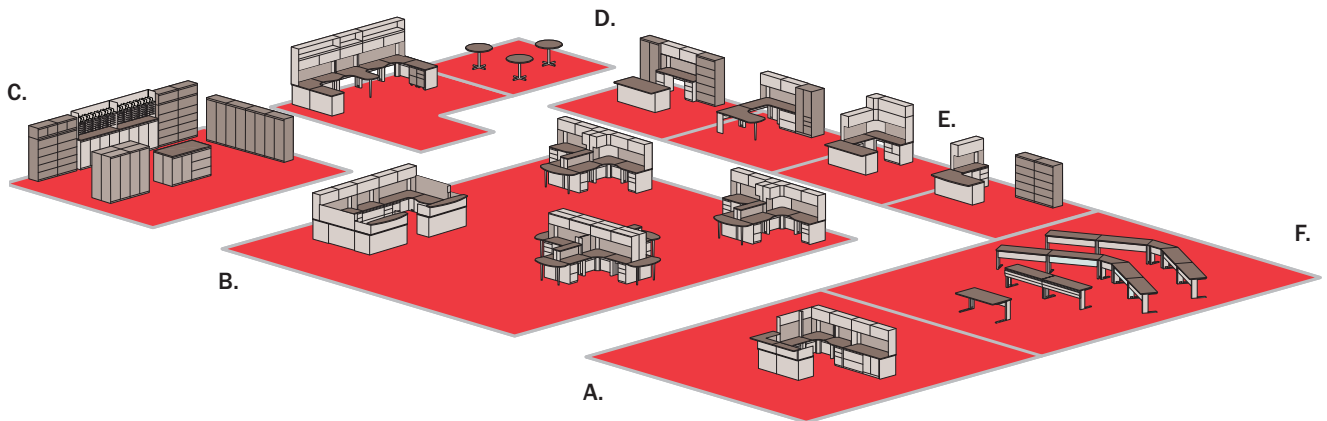

**PRIVATE OFFICES**

Modular deskings systems will accommodate any size space and provide the tools necessary for the busy manager.

**TRAINING**

Hard-working, durable tables for today's technology-driven training room include integrated wire management and easy access.

**SOLUTIONS AT WORK**

Just some of the many places where design options fits...

**RECEPTION (A)** Transaction tops combine function and aesthetics.

**TEAM TASKING (B)** Easy interaction, mobile storage and complete wire management creates a productive environment.

**MAIL ROOM (C)** Sorting stations integrate with high density filing and storage cabinets.

**DINING (D)** Multi-use tables in many shapes, and sizes.

**PERSONAL OFFICES (E)** U-Unit equipped with a corner overshelf and a stackable overshelf system in a compact footprint.

**TRAINING (F)** Tables with wire management, power/data and study carrels.
